

Mom's Fever

- Dr. Binod Pokhrel, Chief Chemist (Water Quality), PHE & WS Deptt., Arunachal Pradesh

Mom, your face is turning so red!

Oh, I could feel the pain of your pyrating body.

Still You stay so tranquilized with no sign of complain.

I enquired whether any maladies You suffered.

“Nay” she replied.

“However, my son, you can provide solace to my pain acting on time.”

My distress on zenith compelled to ask “How?”

Her reply left me stunned.

Our greed of exploiting her led to the extinction border.

Her covert tears would flush away the apparent ego we shoulder.

Oh fellows! Mom’s fever is not her alone pain.

It’s might be the end of one’s sense of interminable gain.

Let’s put hand in hand and help her recover,

Our Mother Earth must overcome ‘Global Warming’, her fever.
